

“WHACKED”

St. Andrew’s will be putting on another spellbinding theatrical performance Wednesday March 28th and Thursday March 29th at 7pm. “Whacked” is made up of two comedic, one-act plays that will have the audience rolling in the aisles.

1 “We’re Not Making This Play Up As We Go-Honest!”

The curtain opens on a performance of the drama “Tragic Love.” The problem is that most of the cast is sick and has been replaced by the stage crew, who barely know the plot, much less the lines. Their attempts to re-enact a play that they know close to nothing about, compounded by the lack of a set and a giant bowl of gravy, leads to great comedy and one very unexpected ending!

2 “Butterfinger”

When the prototype for a new, top-secret candy, codenamed “Butterfinger,” goes missing, Bon Bon is pulled back into action to protect the nation. Along the way, he’ll cross paths with an outrageous and tasty array of friends —and foes— like the dastardly villain K. Andy Bars, the aloof and volatile Her She Kisses, and the voluptuous air-head, Marsha Mellow. Girls, gadgets, and bad puns abound in this hilarious melodrama, so strap in for the ride...it’s time to take a bite out of crime.

Tickets are \$10 for adults and \$5 for students.

Tickets can be purchased from Lekeisha Thomas in the front office starting on March 19th (as well as at the door). Get your tickets early however, because seating is limited.

**Come and be amazed by the creative talents of
St. Andrew’s Upper School!**

Safer Healthier Home

An Ounce of Prevention Keeps the Germs Away

Follow these easy and low-cost steps to stop many infectious diseases.

Clean Your Hands Often

Keeping your hands clean is one of the best ways to keep from getting sick and spreading illnesses.

Use Antibiotics Appropriately

Antibiotics don't work against viruses such as colds and flu. Unnecessary antibiotics can be harmful. Antibiotics should be taken exactly as prescribed by your doctor.

Routinely Clean and Disinfect Surfaces

Cleaning with soap, water, and scrubbing *removes* dirt and most germs. However, using a disinfectant cleaner *kills* germs, giving even better protection.

Be Careful with Pets

Pets should be routinely cared for by a vet. Babies and children under age 5 should be watched carefully around pets and animals. Always wash hands after touching animals or animal waste.

Handle and Prepare Food Safely

- Clean hands and surfaces often
- Separate – don't cross-contaminate one food with another
- Cook foods to proper temperatures
- Chill – refrigerate foods promptly

Avoid Contact with Wild Animals

Wild animals can carry deadly diseases and pass them to you and your pets. Keep your house free of wild animals by not leaving any food around. Keep garbage cans sealed.

Get Immunized

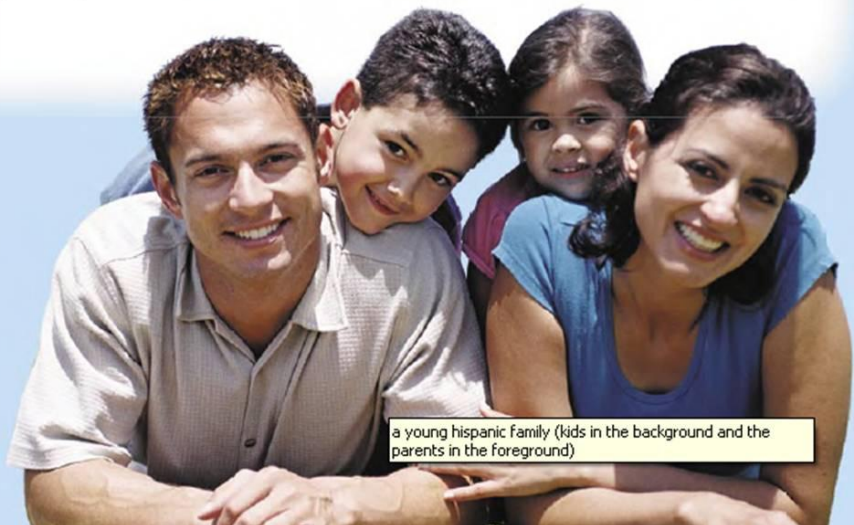

Getting immunizations is easy, low-cost, and saves lives. Make sure you and your kids get the shots suggested by your doctor.
